Statement on 3<sup>rd</sup> party app

Citi is not collaborating with gini on its recently launched banking balance aggregator service offering in Hong Kong and we have not authorized gini to access our system or shared any client data with them.

We would like to take this opportunity to remind our clients again on the importance of safeguarding your banking details including any security tokens and passwords and never disclose your banking details or passwords to any third party. If you need further information, please contact our CitiPhone Banking at (852) 2860 0333.

While Citi is not working with gini, as the first bank in Hong Kong to open APIs, we are open to working with any developer through our open API platform where we can provide innovative and secure services to further enhance our clients' banking experience.
