Risk Disclosure

IMPORTANT TO NOTE - APPLICABLE TO ALL INVESTMENT PRODUCTS:

Investments are not bank deposits, or obligations of, or guaranteed by, or insured by Citibank (Hong Kong) Limited, Citibank N.A., Citigroup Inc., or any of its affiliates or subsidiaries, or by any local government or insurance agency, unless specifically stated. Investments involve risks, including the possible loss of principal amount invested. Past performance is not indicative of future results, prices can go up or down. Investors investing in products denominated in non-local currency should be aware of the risk of exchange rate fluctuations that may cause a loss of principal when foreign currency is converted back to the investors' home currency. The risk of loss in foreign exchange trading can be substantial. Foreign exchange trading is subject to rate fluctuations which may provide both opportunities and risks. Placing contingent orders, such as "stop loss" or "stop limit" orders, will not necessarily limit losses to the intended amounts. Market conditions may make it impossible to execute such orders. Investors may experience a loss when they convert foreign currency back to their home currency. Foreign exchange trading involves risk, including the possible loss of the principal amount invested. Investors should therefore carefully consider whether such trading is suitable in the light of their own financial position, investment objectives and risk profile. Exchange Controls imposed by the relevant authorities may also adversely affect the applicable exchange rate. RMB exchange, like any other currency, is subject to exchange rate fluctuations, which may provide both opportunities and risks. The exchange rate of RMB can go up and down. The applicable rate of RMB exchange is the offshore ("CNH") rates. The offshore ("CNH") rate may be different from the onshore ("CNY") rate. Investments are not available to U.S. persons. All applications for Investment and Treasury Products are subject to specific terms & conditions of the individual products.

I/We understand and accept the identities of different parties and the roles that they play in relation to the Bonds / Structured Products /Mutual funds ("Investment Products") as disclosed in the relevant offering documents of the respective Investment Products. For example, the Fund House, Issuer, the Swap Counterparty (if any), the Swap Guarantor (if any) and certain named agents (e.g. the Calculation Agent or Paying Agent (if any)) may be the same or affiliated corporate entities, although performing different functions in respect of the investment products and the structure underlying them (if applicable). There may be various actual or potential conflicts of interest between Citibank (Hong Kong) Limited, Citigroup Inc. or their affiliates or subsidiaries ("Connected Persons") and an investor of the Investment Products, as a result of the various investment and/or commercial businesses and/or activities of the Connected Persons. I/We accept, on purchasing the Investment Products, that any such conflict may exist and may be prejudicial to an investment in the Investment Products.

Borrowing capital to fund the purchase of investments (i.e., leveraging) can significantly increase the risks of the investment such that if the value of the investments decreases on a mark to market basis, leveraging will magnify that decrease in value of the daily mark to market value of the investments.

I/We shall consider to take independent tax advice before committing to the purchase of any investments.

I/We understand that you do not provide tax advice and therefore responsibility for any tax implications of investing in any investment rests entirely with me/us. I/We note that the tax treatment will differ from jurisdiction to jurisdiction. The local tax rules in my/our country of tax residence will dictate the tax treatment of any income derived from my/our investments. I/We will assume, and be solely responsible for, any and all taxes of any jurisdiction or governmental or regulatory authority, including, without limitation, any stamp duty or other like assessment or charges that may be applicable to any payment to me/us in respect of my/our investments.

I/We agree that (a) any information, suggestion or recommendation communicated to me/us by you, although based upon information obtained from sources believed by you to be reliable, are for consideration only; (b) you make no representation, warranty or guarantee as to, and, save to the extent provided otherwise in Terms and Conditions for Accounts and Services or other applicable terms and conditions, shall not be responsible for, the accuracy or completeness of, or my/our reliance upon, any such information, suggestion or recommendation; and (c) any information provided by or through you to me/us may only be used for the purpose of assessing investment opportunities available to me/us and I/we will not disseminate the same to any other person for any purpose.

Understanding the importance of portfolio diversification

Portfolio diversification is an important element for me/us to consider when making investment decisions. I/We understand that concentrated positions may entail greater risks than a diversified portfolio. I/We will ensure that any investment decision made does not result in a significant exposure of my/our total net worth to investment products and in the event of complete loss of my/our investment, my/our livelihood will not be affected.

Certain factors that affect the assessment of whether my/our overall investment portfolio is sufficiently diversified may not be evident from a review that only

includes my/our account(s) with you. Therefore it is important that I/we should carefully review the entire investment portfolio (with you and other institutions) to ensure that it meets my/our investment goals and is within my/our risk tolerance, including my/our objectives for asset and issuer diversification.

Growth Enterprise Market (GEM)

Growth Enterprise Market (GEM) stocks involve a high investment risk. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. GEM stocks may be very volatile and illiquid. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

- (a) Trading under China Connect is subject to a cross-boundary investment daily quota;
- (b) Any Northbound trading under China Connect will not be covered by Hong Kong's Investor Compensation Fund;
- (c) China Connect will only operate on days when both markets are open for trading and when banks in both markets are open on the corresponding settlement days. I/We should take note of the days China Connect is available for trading and decide according to my/our own risk tolerance capability whether or not to take on the risk of price fluctuations in A-shares during the time when trading on China Connect is not available;
- (d) Trading under China Connect is subject to currency risks; and
- (e) I/We should familiarize with myself/ourselves and observe the eligibility restrictions in relation to China Connect and the applicable Mainland China laws and regulations concerning Northbound trading and in particular, the shareholding restrictions imposed and my/our disclosure obligations thereunder.

Debt Securities

I/We understand that investment in Debt Securities (including Bonds and Certificate of Deposit) involve risks, including but not limited to market risk, credit and

default risk of the issuer, liquidity risk, foreign exchange risks and early redemption risk, etc. Some Debts Securities, (for example, Convertible Debt Securities/ Exchangeable Debt Securities/ Perpetual Debt Securities/ High Yield Debts Securities/ Subordinated Debts Securities, etc) may contain complex structure and special features and risks that warrant special attention. I/We understand that any document provided by you (e.g. Debt Securities Indicative Termsheet) are not intended to be exhaustive description of the risks involved in any individual Debt Securities, but rather a general statement of the risks commonly associated with Debt Securities. I/We should read and fully understand the risks and details in the relevant offering documents or Prospectus before investing in any Debt Securities.

Premium Account

Premium Account is in substance a foreign currency investment involving derivatives. It is subject to exchange rate fluctuations which may create both opportunities and risks. Investments in Premium Account will be repaid in the currency that is the weaker of the base currency or the alternate currency. If the alternate currency weakens against the base currency, I/we will be repaid in the alternate currency. This means I/we may effectively incur a loss on the principal amount of the Premium Account, because the amount repaid at maturity, when converted back into the base currency, may be lower than the amount of the base currency that I/we initially invested. The interest earned under the Premium Account may not compensate for this foreign exchange loss. All obligations herein for Premium Account are payable solely at and by Citibank (Hong Kong) Limited. Citibank (Hong Kong) Limited ("the Bank") is acting as a principal in providing the product. The Bank and/or its affiliates may receive benefit from the origination and distribution of the product.

Market Linked Account

The amount of gain is limited to the predetermined interest even if the investor's view of the market movement of the underlying is correct. Investments in Market Linked Account is not the same as nor should it be treated as a substitute for normal fixed time deposits. Investors investing in Market Linked Accounts denominated in non-local currency should be aware of the risk of exchange rate fluctuations that may cause a loss of principal. Pre-termination prior to maturity is subject to your approval and any pre-termination costs incurred will be deducted from the investment.

Treasury Plus

Treasury Plus is a leveraged investment account for investing in Premium Account and/ or foreign exchange.

I/We understand you only offer overnight tenor for Treasury Plus. As the interest rates for Treasury Plus may vary during the period for investment in Premium Account and/ or foreign exchange, the interest costs for me/us may therefore also vary. This may affect the net return on investments in Treasury Plus.

The degree of investment risk I/we face is greatly increased because the transaction is leveraged. Relatively small movements in the exchange rate will have a multiplying effect on my/our corresponding gain or loss. The risk of loss in Treasury Account Plus can be substantial. I/We may sustain losses in excess of my/our original investments. I/We may be called upon at short notice to deposit additional funds. If the required funds are not provided within the prescribed time, my/our position will be liquidated. I/We will remain liable for any resulting deficit in my/our account.

Investments in Premium Account cannot be terminated before maturity. If I/we pledged Premium Account as collateral, any loan repayment or top up requirement before maturity will have to be covered by additional funds. If I/we fail to bring in sufficient additional funds, you have the discretion to terminate investments in Premium Account before its maturity date to repay the loan outstanding. Such early termination may be made at a loss to me/us and I/we will be liable for any resulting deficit in my/our accounts. I/We should seek independent advice before making a commitment to invest in Treasury Plus. In the event that I/we choose not to seek independent advice, I/we should carefully consider whether a Treasury Plus is suitable in the light of my/our own investment objectives, financial position and risk profile.

FX Margin Trading/Foreign Currency Leveraged Investments

The risk of loss in foreign exchange margin trading or leveraged investments (including Foreign Currency Leveraged Investments) or derivatives can be substantial. I/We may sustain losses in excess of my/our initial investments. Placing contingent orders, such as "stop loss" or "stop limit" orders, will not necessarily limit losses to the intended amounts. Market conditions may make it impossible to execute such orders. I/We may be called upon at short notice to deposit additional margin funds. If the required funds are not provided within the prescribed time, my/our position may be liquidated. I/We will remain liable for any resulting deficit in my/our account. I/We should therefore carefully consider whether such leveraged trading or derivatives are suitable in light of my/our own financial position and investment objectives. The high degree of leverage due to small margin requirement that is often obtainable in currency trading or derivative can work against me/us as well as for me/us. The use of leverage can lead to large losses as well as gains. I/We shall carefully study the market before I/we invest in FX Margin Trading / Foreign Currency Leveraged Investments.

Structured Product Investment

I/We understand that investment in Structured Products involve risks. Structured products are obligations only of the issuer and are subject to the issuer's credit and default risks. There may be limited liquidity for structured products and there is no guarantee for the existence of a secondary market. I/We may not be able to sell the structured product in a secondary market prior to maturity. I/We also understand that structured products involve derivatives and may contain special features, conditions and risks that warrant special attention. I/ We should carefully read and fully understand the risks and details in the enclosed Terms and Conditions for Structured Note Transactions, the full set of offering documents and subscription forms prior to making an investment decision.

Gold Manager

The price of Gold is volatile and I/we should recognize that value of my/our investment may go down as well as up. My/Our investments in Gold are subject to investment risks, including the possible loss of principal invested. Investments in Gold are not insured by any governmental agency. Gold Manager does not represent a deposit of money and provides no yield nor interest. I/We should also be aware of the risk of foreign exchange rate fluctuations and I/we may experience a loss when I/we convert Gold back to my/our home currency. I/We understand that Gold Manager is being set up under a Notional Gold Purchase Scheme under which Gold Manager only deals with Paper Gold and is not backed by physical gold and that you have total discretion within such Scheme to determine your own gold hedging arrangements. Citibank (Hong Kong) Limited ("the Bank") is acting as a principal in providing the product. The Bank and/or its affiliates may receive benefit from the origination and distribution of the product.

Gold Premium Investment

Gold Premium Investment is for Professional Investors only. Gold Premium Investment is a non principal protected structured product with embedded derivatives. I/We should be aware of the speculative risk and derivatives risk of Gold Premium Investment. The amount of maximum potential gain under the Gold Premium Investment is capped and limited to the pre-determined interest. In the worst case, I/we could suffer a total loss of my/our investment amount. I/We understand that the Gold Premium Investment is designed to be held until its maturity and NO early termination is allowed. Investment in the Gold Premium Investment is not equivalent to the purchase of physical gold. The volatility of the price of gold may have an adverse impact on the potential return of the Gold Premium Investment as such potential return is linked to the performance of the price of gold relative to the Designated Currency. Movements in the exchange rates can be unpredictable, sudden and drastic and affected by complex political and economic factors. I/We should also be aware of the currency risk, underperformance risk (specific to gold as Base Choice), exposure to the price movements of gold and therefore, I/we may lose all, or a substantial part, of my/our investment. Citibank (Hong Kong) Limited ("the Bank") is acting as a principal in providing the product. The Bank and/or its affiliates may receive benefit from the origination and distribution of the product.
